Tabbed and Filtered QuickForms

- **Plugin type:** Local
- **Plugin name:** TabbedQuickForm
- **Versions:** 2.7 to 3.1
- **Distribution:** Unreleased
- **Disponibilité:** Release Candidate

This plugin changes radically the way forms are organized by using tabs for accessing to parameter panels. Additionnaly it will allow filtering all QuickForm based forms from unwanted or useless parameters, and select a default value for the hidden elements. Users may choose switching between “Simple” or “Complete” forms (site scope), if they are allowed to, or get the forms version the administrator wants to force the users.
