

## Availability condition: Time spent in the course (CourseTime)

- **Component Type:** Availability condition
- **Name:** Coursetime
- **Technical Name:** availabilit\_coursetime

- **Versions (maintained):**  to 
- **Distribution:** moodlemarketplace.
- **Availability:** Stable

This plugin makes it possible to make activities accessible only after a certain working time has been measured in the course. The measurement of this working time is obtained from the block [Use Stats](#) which must be installed beforehand in Moodle.

### Guides

- [Install Guide](#)
- [User guide](#)
- Technical Guide: Not relevant

### Prerequisites

This module is based on the [Use Stats Block](#) as main provider of the spent time measurements.

### Features

This module has a very simple structure.

- Added an availability rule.
- Choice of a time (in minutes) and a reference course.

### Builds

| Branch | Check status              |
|--------|---------------------------|
| 405    | MOODLE_501_STABLE pending |
| 501    | MOODLE_501_STABLE passing |

Note : Failing status is not necessarily the sign of a non functioning module. It just says that the moodle code standards check are not fullfilling. This is a continuous effort of us rewriting the plugin code to get it compliant.
