

# Installation Guide

## Availability condition at day shift from course start

### Installing the plugin

this plugin installs in the start way:

- Unzip the plugin archive in the /availability/condition directory of your moodle installation.
- Browse to the *Administration > Notifications* to terminate the install.

### Global Settings

IMPORTANT NOTE : Availability restrictions are NOT configurable until Moodle 3.0. 

Global settings are located in the Site administration menu at the path :

Site administration > Plugins > Availability restrictions > Days

The administrator can choose just one option in the plugin global settings:

### Reference date

The reference date for calculating the cutoff date can be chosen as being:

- **The course start date.** In that case the cutoff date for the controlled item is absolute and identical for all students. (default)
- **The date of the user's enrolment.** In that case the cutoff date will be relative for each student individually and equally.
