Activity Publisher block

- **Component Type:** Block
- **Name:** Activity Exporter
- **Technical name:** block_activitypublisher
- **Group:** Shared resources
- **Versions:** m31 to m51
- **Distribution:** Moodle MarketPlace
- **Availability:** Stable

Presentation

The “Activity Exporter” block allows you to create a Moodle archive (MBZ) of any activity or resource on the device in order to make a backup, and also allows you to address it as a shared resource. It can therefore be a valuable complement to the Shared Resources activity on a course.

A teacher does not have the permissions to see this block unless you add them to him.

Rendering on a course

- Choose from the drop-down list the activity to export
- Click export activity

Mutualize a resource or activity

Check the box of the instance to be archived and validate by clicking on the link “Export in a Moodle archive”.

Click on the “Publish in the library” link. You will arrive at the metadata intelligence interface to be filled in. Think about safeguarding.

Manage publication exports

This link via the “Activity Exporter” block allows you as its name suggests to manage your exports and see their state of publication in libraries:
