Datacart block/Data retrieval assistant: Installation guide

Installation

The basic installation of this block follows the standard rules for installing blocks on your Moodle platform:

- Unzip the archive into the 'blocks' directory of your Moodle installation
- Go to the administration notifications to complete the installation of the block.

To allow interaction with the “Database” module, you must enable Moodle's “customscripts”, then set up the overrides provided by this module.

Enabling the customscripts

In your Moodle installation's `config.php` file, add the following line:

```
$CFG->customscripts = '<path_to_moodle_wwwroot>/customscripts';
```

Setting up the customscripts

Copy the contents of the `blocks/data_cart/__customscripts` directory into the `/customscripts` directory of your installation.
