# Datacart block/CV basket: User guide

## Introduction

This block lets users retrieve, globally or individually, the CVs deposited in the CV library. It can retrieve them anonymised or not.

## Implementation

Drop a CV basket block in your course

- Switch to Edit mode
- Add a block/CV basket
- Click the gear wheel to access the block configuration

- **Block title:** Title of your choice
- **Document generator choice:** Name of the PDcertificate instance in the course
- **Sensitive data fields:** Names of the form fields you want to anonymise, separated by commas.

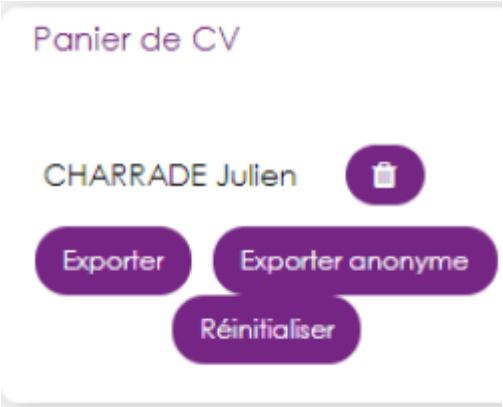

Example: cv_nom,cv_mail,cv_prenom,cv_linkedin,purple_entreprise_mail

- Once your settings are saved, the block displays empty.

- As users make submissions, the documents available for download are displayed in the block.

## Downloading the CV documents

- Click the assignments to download as a ZIP file.

- The export is done in two possible modes: anonymised CVs or not.
- In the folder of an anonymous CV, a TXT file indicates who it is, to ease a mapping with the non-anonymous CVs. Example: VTVZT YWUXWUWY : Julien DUPONT

## Credits

- 2017 Valéry Frémaux (valery@activeprolearn.com) - Design, coding
- 2017 Florence Labord (florence@activeprolearn.com) - tests, functional review - Documentation
