Profile Specific HTML Block (HTML content specific to a profile value): User guide

This block displays short HTML content depending on values found in the user profile. It performs a boolean test on a single value, on two combinable fields.

Using the block

- Switch to edit mode
- Place the block on a course page or on the dashboard (MY) page, for example
- Configure the block

Block configuration

- **Visible block title:** the title chosen for the block
- **Field 1:** Choice of the first profile value
- **Operation:** Choice of the boolean OR or AND (optional)
- **Field 2:** Choice of the second profile value (optional)
- **Content for all:** Content displayed to all profiles
- **Content if matching:** Content displayed if the condition is met
- **Content if not matching:** Content displayed if the condition is not met

Possible profile values (Last update 31/03/2017)

- Institution
- Department
- Your registration has been confirmed
- City
- Country
- Email
- Access to platform X (MNet network circulation)

Examples

Displaying a message on the city
