PublishFlow block (MNET based course publishing)

- **Component type:** Block
- **Name:** PublishFlow
- **Technical naem:** block_publishflow
- **Unupported versions:** 1.9, 2.2 to 3.0
- **Versions:** 3.1 to 3.3
- **Candidate version:** 3.4
- **Distribution:** Public.
- **Availability:** Stable.
- **Repository:** https://github.com/vfremaux/moodle-block_publishflow

Description

Le Publishflow est le chainage de plusieurs fonctionnalités. Il permet de mettre en place, publier, déployer et alimenter un site de production.

Il comprend trois fonctions qui permettent de le gérer :

- La “fabrique” qui permet de mettre en place différents cours et les tester.
- Le “catalogue” qui permet de stocker les cours finalisés mis en place dans la “fabrique”.
- Le “site de formation” sera ensuite la plateforme sur lesquels vous pouvez ajouter les différents cours du “catalogue.

Guides

- Install guide
- User guide
- Technical guide

Features

- Publish : publishes a course from a “factory moodle” to a “course catalog moodle”
- Deploy : Deploys a course from a “course catalog moodle” to a “learning center moodle”
- Retrofit : Feedns back a “factory moodle” from a “learning center moodle”
- Choose default course arrival category or point remote category for deployement
- Direct access to the remote course after deployement

Secondary features:

- Publish for test : deployes directly from a “factory moodle” to a “learning center moodle” for testing a learning path.

Pro version

- Post scripts a deployment after restore has been done.
