

User Delegation Block

- **Component Type:** Block
- **Component Name:** User Delegation
- **Family:** Administration
- **Versions:**  à 
- **Old versions:** 2.2 à 2.6
- **Distribution:** ActiveProLearn SAS
- **Availability:** Stable

In Moodle, managing users is usually a strict delegation of Moodle administrators, using users management GUI or feeding APIs.

There is no way in standard Moodle to delegate users creation and management to non admin users.

The User Delegation blocks overrides this issue and provides to a non administrator a minimal interface to manage his on behalf users, assign them to the courses he is managing, thus being a partial localized user administration.

Guides

- [Install Guide](#)
- [User Guide](#)
- [Technical Guide](#)

Features

- Accessing to “My own users” management boards
- Adding asingled behalved user
- Importing (capability controlled) a set of behalved users using a CSV file
