Use Stats Block : User guide

Adding a block instance

The Use Stats block can be added in any page context in moodle, pursuant the addinstance capability is owned by the current user.

Just turn the curent page environement in edit mode, and use the 'Add block' menu. Choose the “Use Stats” entry to add an instance to the page.

Only one single instance can be aded.

Data access modes

- Student mode : For students, or for not specially enable users, only your own statistics will be displayed.
- Admin mode : In administrator (or specially enabled mode), you will be able to check the stats of any user present in the current environement.

Exploration modes

- Shifting time window : the use stats gives statistics over a gliding windows ending at 23h59 local time of the current day, and starting some day count before the current date. The larger is the window, the higher is the performance impact on the server.
