

Where is Block

- **Component Type:** Block
- **Component Name:** Where is
- **Family:** Administration
- **Versions:** 2.2 à 
- **Distribution:** Provided in custom integrations
- **Availability:** Stable

When managing large moodle arrays for multi-tenant installation, the administrator often needs to know where some users have accounts and where they eventually are working in.

This block allows to launch a scan to get all this information about a single user.
