Course Notification Block

- **Component Type:** Block
- **Name:** Course Notification
- **Technical name:** block_course_notification
- **Family:** Course Animation
- **Versions:**  à 
- **Distribution:** Publique (temporaire)
- **Availability:** Stable
- **Repository:** https://github.com/vfremaux/moodle-block_course_notification
- **RGPD compatibility:** yes

Overview

this blocks helps to automate some course animation tasks by detecting some specific situation of the learner related to his participation and check some key dates to send notification message to students.

When course or enrol starts: sends some reminders 7 days and 15 days after the course or learner access opening if not connected to the course.

When course ends: Sends notifications of course or access ending at 15, 7, 5, 3 days back from the end if the user has not accomplished course objectives.

Each notification can be configured (message text and enabled/disabled state).

Inactivity signal

During a course, an additional signal might be triggered when user do not visit the course for a while (adjustable).
