Synchronised enrolments (Enrol Sync)

Presentation

This pseudo enrolment method cannot be administered interactively. Its operation is entirely automatic and tied to an automated synchronisation source such as the ENT Installer or CSV file synchronisation. It lets you qualify the enrolments obtained by these automatic methods on a specific, identifiable source compared with the other possible enrolment sources for a Moodle course.

Guides

- Installation guide
- User guide
- Technical guide

Feature summary

- Specific enrolment source
- Compatible with ENT Installer (LDAP)
- Compatible with Tool Sync (CSV feeds)
- Automatic management of method instances
- Protected, non-modifiable enrolments

Technical sheet

- **Component type:** Enrolment method
- **Name:** Sync
- **Technical name:** enrol_sync
- **Supported versions:** m41 to m53
- **Distribution:** Integration
- **Availability:** Release Candidate
- **GDPR compliance:** >= 3.4.2 with GDPR plugins

Builds

Note: a “Failing” status does not necessarily mean that the plugin does not work. This status reflects the result of automated tests checking the code against Moodle's strict standards. We are continuously working on bringing all supported plugins progressively into compliance with these development rules.

Branch	Continuous integration tests
405	MOODLE_501_STABLE pending
501	MOODLE_501_STABLE pending
