

Overriding a page with a single activity

Concept

In some situation where the learning audience has quite low digital skill, you need the learning material and layout to be “as simple as possible”, and NOT ask learners to build a strong “skill of orientation” in a course structure.

Overriding a page with a single activity let installing an activity (such a quiz, and assignment or a lesson) in the linear course progression.

In some way, the page format course can react like a Scorm package with a simple instructions/activity alternance.

Setting up an overridden page

When in edition mode,

1. Activate the “Add new Page” wizard,
2. Select second option at step 1

Step 2 will ask you for choosing an activity.

Override page by an activity module

Choose activity for the page	No override - Standard page
Select the Course Menu Parent Page	None
Publish to students	This page is published to students
Display in Course Menu	No override - Standard page

[Previous step](#) [Cancel](#) [Next step](#)

use the first select to choose an activity

Override page by an activity module

Choose activity for the page

Publish to students

Display in Course Menu

No override - Standard page

No override - Standard page

Course Heading :

Course information : coursedata_140

Section title : sectionheading_294

Feedback - Test Feedback

Forum - Annonces (ANNONCES)

Glossary - Test glossaire

Glossary - Test glossaire

Quiz - test

Rich Media Zone - Test modele imagetext

SCORM package - Module : LCBFT Lutte contre le blanchiment et le financement du terrorisme

Note that in this list, all the course modules of the current course are available, whether they are published or NOT in pages. For very big courses, the further roadmap should examine a more scalable GUI to select activity (such; f.e. as searchable select).

Other settings

Audience: The same audience switch is provided than in the general case.

Publish in Course Summary: Here also you can choose if this page is to be visible in the [Course Summary](#) block.

Finally finish the wizard with step 6:

Confirmation

- ☐ Add the page as next page
- ☐ Add the page as subpage

Finish

Cancel

Confirmation screen let you:

- Add the the page as following sibling of the curent page (the page you were on before initiating the action), or
- Add the page as last subpage of the current page (Pro)

*Note: Subages are only available in the Pro version requiiring an **active License Key**.*
