

Administrator Guide

Format page

Global settings

Path : Site administration ⇒ plugins ⇒ course formats ⇒ page format

Page Format

Use images for navigation Default: Yes
format_page | navgraphics

If enabled, the nav commands will use images

Opt for a flat reordering method Default: No
format_page | flatreordering

If active, uses a simple arrow commands to move pages.

Images for page renderer format_page | pagerendererimages

Maximum file size: Unlimited, maximum number of files: 20

Default: Empty

A set of alternative images used as default images for page format renderer. These images may be overridden by the theme. The image set should provide, in any of .svg, .png, .jpg, .gif format:

- next_button
- next_button_disabled
- prev_button
- prev_button_disabled

- **Browsing images (navgraphics):** Enable or not alternative images. Simple arrows by default.
- **Opt for a flat reordering method (flatreordering):** Enable or not flat reordering rather than JS tree manipulation library.
- **Alternative images for the page format (pagerendererimages):** Some images must care respecting expected names (see list), essentially to customize the previous/next buttons. Png or JPG expected.
 - next_button
 - next_button_disabled
 - prev_button
 - prev_button_disabled

Pro version additional settings

- Protect idnumbers** Default: No
format_page | protectidnumbers
If enabled, the page idnumbers cannot be modified. New pages come with empty IDnumbers. this can be usefull when course structures are built automatically by a building script.
- Protect admin page** Default: Yes
format_page | protectadminpage
If enabled, the initially created administration page will be author protected
- No public pages** Default: No
format_page | nopublicpages
If checked, avoids public pages to be accessible for non connected users.
- Enable page side discussions (default)** Default: No
format_page | defaultpagediscussions
If enabled, a side discussion page will be available for conceptor coordinations for each course page
- Re-use course modules elsewhere** Default: No
format_page | reusecoursemodules
If enabled, this allows to reuse course modules from any page on another page. This needs a referenced patch to be installed to work. or it will throw an error. This results in less portable course construction.
- No page comments** Default: No
format_page | nocomments
If active, page comments are disabled for all courses.

- **Protecting identification (protectidnumbers):** If enabled, page idNumbers are non-modifiable. New pages have a non-filled/empty idNumbers. Tis is essentially useful in case of automated course structure creation.
- **Protecting the administration (protectadminpage):** If checked, the initial administration page will be created in “protected” mode, forbidding teachers (including editing) to alter it.
- **No public pages (nopublicpages) :** If checked, prohibits unconnected access to public pages. Public pages are readable only by authenticated users (including guest user).
- **Enable page discussions (default) (enablepagediscussions):** Tells the default state of page discussions for any new course.
- **Re-use course modules elsewhere (reusecoursemodules):** If checked, re-using activites and resources on other pages than the original page is possible. Format page core patchs MUST BE installed for this feature to work. Specially the patch in /course/lib.php disabling the course consistency check.
