Page Format: User Guide

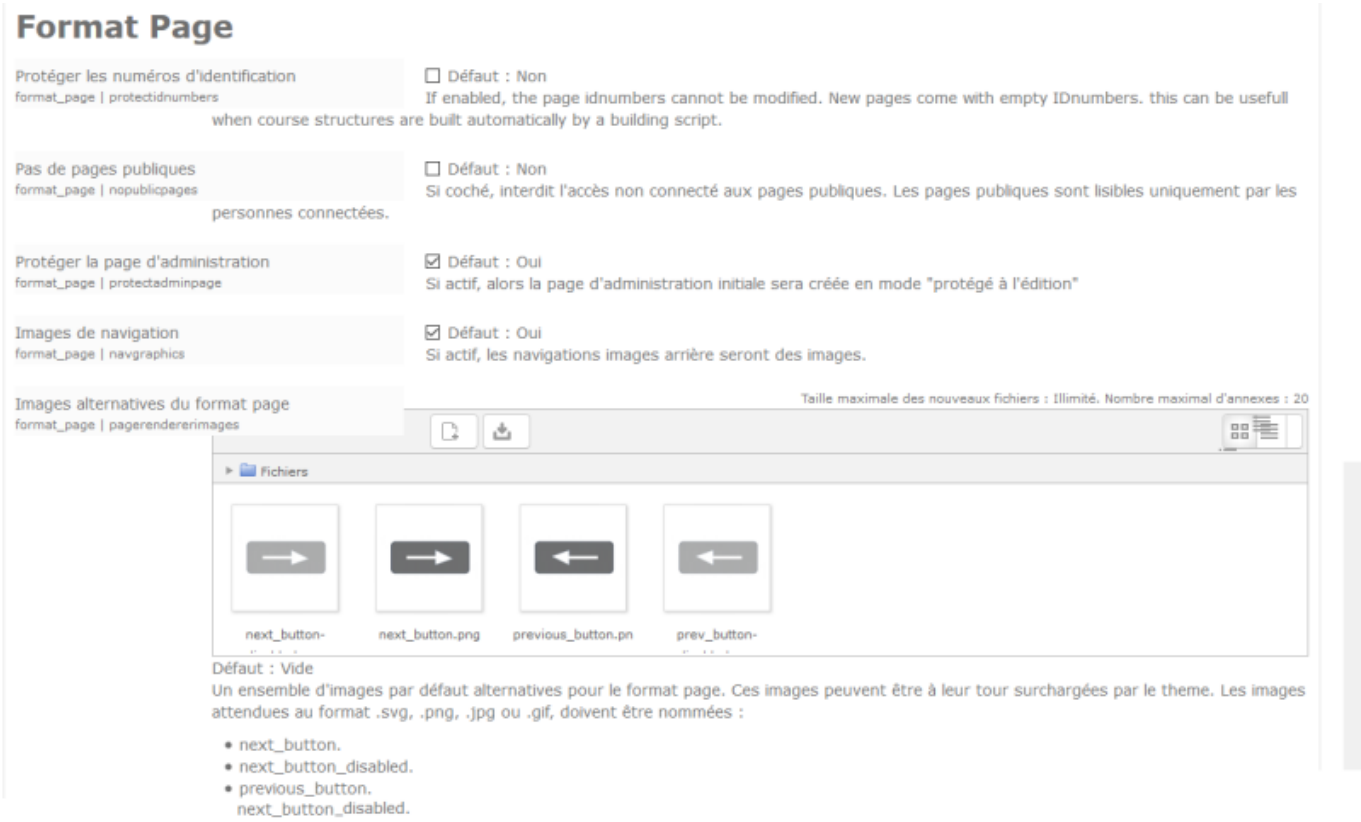

Central plugin settings

Path: Site administration/plugins/course formats/page format

- **Protect identification numbers/protectidnumbers:** If enabled, page id numbers cannot be modified. New pages have an empty, unset identifier number. Useful when using an automatic course structure creation script.
- **No public pages/nopublicpages** : If ticked, forbids non-logged-in access to public pages. Public pages are then readable only by logged-in people.
- **Protect the administration page/protectadminpage:** If enabled, the initial administration page will be created in “protected from editing” mode
- **Navigation images/navgraphics:** Enable or not the alternative images. By default simple arrows
- **Page format alternative images/pagerendererimages** : Be careful with naming, it is the only constraint on the images so as to choose the look of your forward/back arrows. Png or JPG
    - next_button
    - next_button_disabled
    - prev_button
    - prev_button_disabled

Rendering

Administration page rendering:
