User account synchronisation

ENT Installer

The account synchronisation retrieves the user profiles and integrates them into Moodle. Additional processing is carried out on some profiles to ease setting up the usage structure in the institutions.

Some features are specific to data synchronisation in the French national education ENTs.

User functions:

- Feeds accounts from one or several RNEs
- Aliases the list of RNEs by the school complex name (ENT)
- Extracts accounts on three profile settings:
  - Student
  - Teaching staff (ENS, CTR, ASE)
  - Others (non-teaching staff authorised on Moodle or administrators)
- All profiles are configurable through the configuration
- Optionally creates the global student cohort (configurable idnumber and name)
- Optionally creates the global staff cohort (configurable idnumber and name)
- Creates the administrators cohort (configurable idnumber and name)
- Creates the teacher categories in the supercategory of the teacher spaces
- Hides the teachers' first names (optional)
- Adds the staff's title (Mr/Ms)
- Detects school heads to assign them a Site manager role (ENT)
- Detects librarians to assign them a librarian role (if the shared library Sharedresource is installed) (ENT)
