Role assignment and enrolments

Moodle feeding by the ENTs

Role assignment based on the LDAP “groups” concept:

- Configuration of the default enrolment method
- Supports school complex aliasing (ENT)
- Configuration of role detection
- Crossmapping of role attributes to role identifiers
- Configuration of role application context detection
- Crossmapping of context attributes to context levels
- Role assignment
- Deletion of missing assignments
- Full vs. differential update option
- Verbose output option
- Simulation option
