MoodleScript: ADD CAPABILITY

MoodleScript Script Engine

Effect

Grants a permission for a capability on an existing role. This changes the central definition of the role. It does not create a local override.

Syntax

```
ADD CAPABILITY <capabilityname> TO <roleidentifier> HAVING
permisssion: <permission>
```

Minimal instruction:

```
ADD CAPABILITY <capablityname> IN <roleidentifier>
```

Examples

```
ADD CAPABILITY moodle/course:manageactivities IN shortname:teacher2 HAVING
permission: allow
```

Specific attributes

- **capabilityname**: a capability name.
- **roleidentifier**: a “role” object identifier. For example: shortname:<roleshortname>
- **permission**: a permission among *allow*, *prevent*, *prohibit*, or *inherit*.

Default values

- **permission** : allow

Other defaults

None
