MoodleScript: ADD COURSE

MoodleScript Script Engine

Effect

Creates an empty course, taking the global course creation settings into account.

Syntax

```
  ADD COURSE <coursefullname> AS <shortname> TO <coursecategoryidentifier>
HAVING
  idnumber: <idnumber>
  visible: 0|1
```

Examples

```
  ADD COURSE Macroeconomics Level 2 AS MACECO2 TO idnumber:DIVERS HAVING
  idnumber: C_0345
```

Specific attributes

- **coursefullname**: The full name of the course. Stops at the keyword AS.
- **coursecategoryidentifier**: a unique course category identifier. 'current' can be used here.
- **shortname**: a short name for the course. Must be unique.
- **idnumber**: an external identifier for the course.

Default values

- **visible** : 1

Impact on the execution stack context

The current course identifier is set to the id of the created course. The current course category identifier is set to the category where the created course is placed.
