MoodleScript: ADD USER

MoodleScript Script Engine

Effect

Creates a user in Moodle.

Syntax

```
ADD USER <username> IDENTIFIED BY "<password> HAVING
firstname: "<firstname>"
lastname: "<lastname>"
email: "<email>"
[ idnumber: "<idnumber>"
  department: "<department"
  ... ]
```

Examples

```
ADD USER harry.potter IDENTIFIED BY "f4t3f*z5'e" HAVING
firstname: "Harry"
lastname; "Potter"
email: "harry.potter@poudlard.edu"
idnumber: "1ST"
department: "Gryffindor"
```

Specific attributes

- **username**: The login identifier.
- **password**: A password, for manual authentication. Must always be provided, even for other authentication types (even if empty). The “manual” password must comply with the password rules.

Default values

- **auth** : “manual”

Impact on the execution stack context

The current user identifier is set to the id of the created user.
