MY Dashboard Page: Use Case 4

Introduction

The request:

A set of at least two Moodles interconnected in a network, with possible circulation between the instances. From an instance A to all the others, and from the destination instance, a return to instance A. In summary:

- Allow the display of all the instances of an interconnected Moodle Mnet network in a Moodle A
- Allow the display of a return link to instance A, once in an instance of the network

The answer:

- Implement network navigation via the usermnethosts block on instance A
- Use the local_my widget my_network (My network) for the return link on the other Moodle instances

1/ MY page

Path: Site administration/Plugins/Local plugins/Enhanced My Moodle

The administrator adds the name of the widget to call for students: my_network

On the MY page, the “my network” widget appears
