MY Dashboard Page: Use Case 8

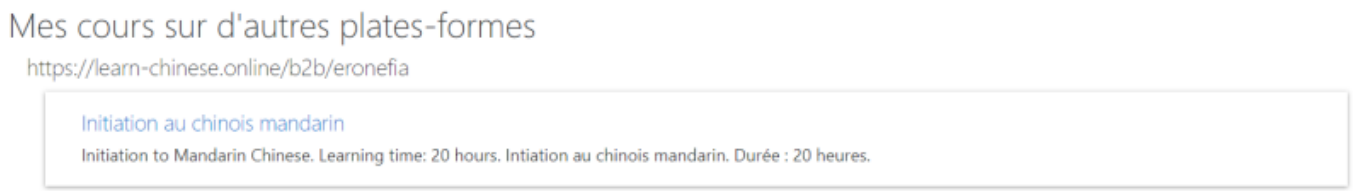

Introduction

The request:

- Be able to display courses located on another platform from the platform I am on, via the Mnet network.

The answer:

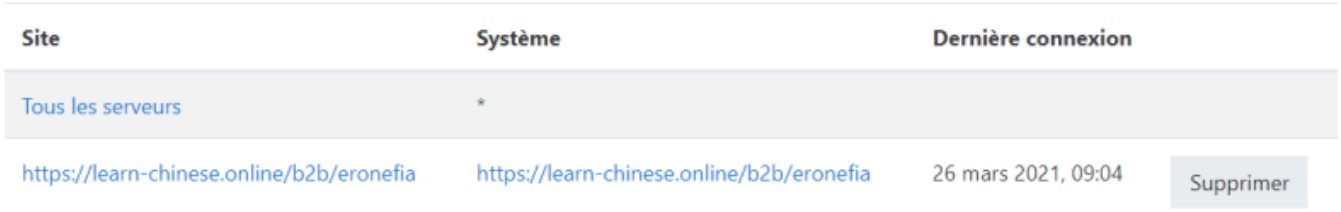

- Creation of the specific widget **my_remote_courses**, called on the students' active module:

Link

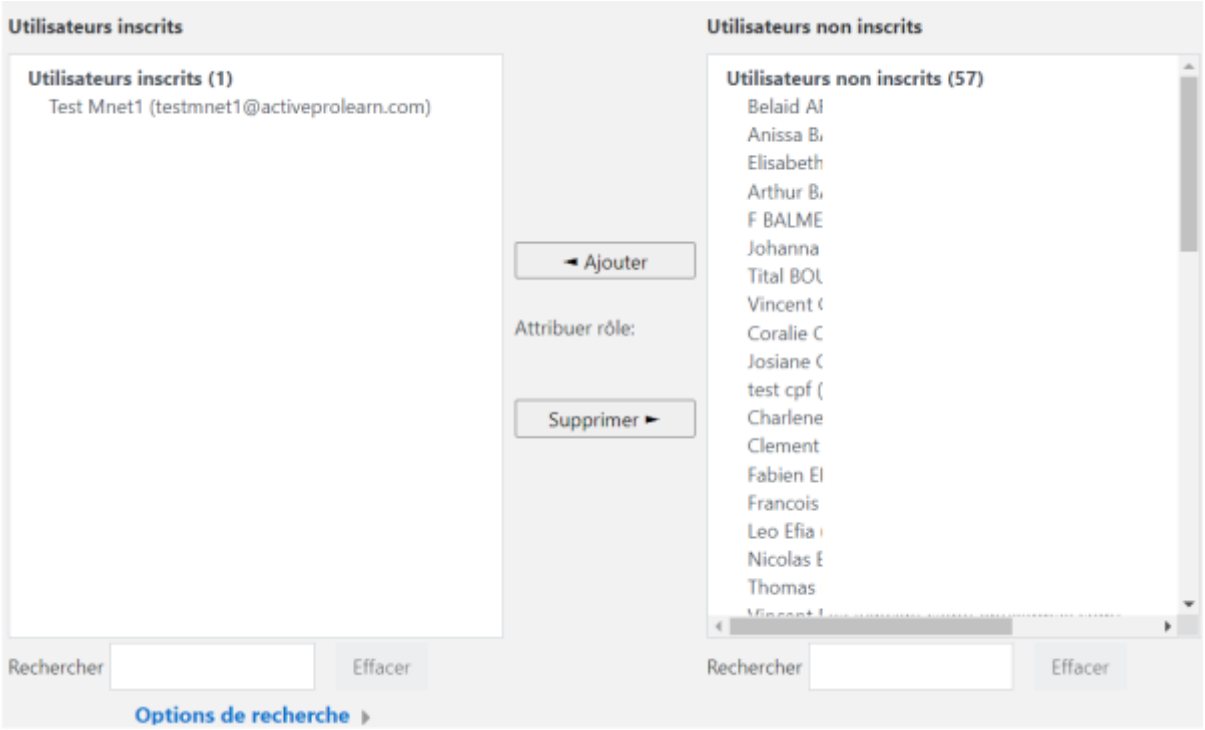

The widget inspects the remote enrolment registry (tables of the mdl_mnet_ group) to display the courses. The local Moodle has a proxy of the definition of the courses that are published and authorised by the other platform.

- Path: Administration/Moodle network/Manage peers

Enrolments

- Path: Administration/Moodle network/Remote enrolment clients
