Installation guide: Local OIDC Server

Plugin installation

This plugin installs in the standard Moodle way:

- Download the zip archive and unzip it into Moodle's 'local' directory.
- Trigger the Moodle upgrade (Site administration > Notifications) to complete the plugin installation

Additional installations

The plugin's advanced functions may require installing the “moodlescript” script engine to support “evaluable expressions”.

See the plugin Script engine for Moodle

PRO version installation

To install the “pro” versions of APL plugins, the **local_vfcore** plugin must be installed beforehand.

You can download all the “Pro” version resources at: APL Distribution Centre, if you hold an APL customer account registered for this product.
