# Back Office: Configuration and implementation of a commercial offer

## Lettering

#### **Invoice lettering**

Invoice lettering records the correspondence between the store's online invoices and external billing software.

According to legislation, legal obligations require the numbering of invoices. The Moodle Online Store records invoices online for the only Moodle sales activity. It is essential to be able to make the correspondence between the online transactions and the invoices "officially" established in an accounting software.

Lettering can not accept several identical references, whatever the catalog used by the store.
