Purchase of Quiz Attempts - Implementation

Product Automation Handler

Description

The main scenario of this handler, on purchase validation in the shop, is to buy additional attempts on a quiz (target test) whose attempts are limited per user.

Prerequisites

Have a marketed course with a quiz set up and the usernumattempts feature in place (Attempt limits per user).

Note flo: add screenshot from here:
https://sumatra36-qualif.activeprolearn.com/course/view.php?id=196&page=8

the quizzes must be located in the same course as the marketed course

Then an associated shop product must be set up.

Note flo: add screenshot from here
https://sumatra36-qualif.activeprolearn.com/local/shop/products/edit_product.php?itemid=193

The product is “purchasable” under the conditions:

- of being logged in
- of being enrolled in the course (checked on the first id of the list)

Note flo: add screenshot from here:
https://sumatra36-qualif.activeprolearn.com/local/shop/front/view.php?view=shop&category=6&shopid=1&blockid=1357

Use case

In practice this allows, for example, a user to buy more attempts than those defined to take a test that would be, for example, a final validation test of learning outcomes, with a view to certification.
