

Back Office : Configuration and implementation of a commercial offer

Define and manage taxes

Access using Sales department block

Link to **“Sales administration”** in the [Sales department block \(Shop Access plugin\)](#)

Then follow link **“Manage taxes”** on the Sales services page.

You must create taxes **BEFORE** you place products.

This is the menu from which you can create the taxes that will subsequently be available for the different products.

Add a tax by linking to “Add a tax”, then provide the following attributes:

- An available name for the tax
- A tax ratio
- The country where the tax applies (choose from dropdown list)
- The calculation formula using variables

Tax Ratio

This ratio is given as a percentage and can be a non-integer (e.g. 19.6 or 19,6 depending on the location)

Formula

This formula recognises the variables \$ttc, \$ht, and \$tr (case insensitive), \$rt being the tax ratio.

In general, the typical formula for taxes is:

$$\text{\$ttc} = \text{\$ht} + (\text{\$ht} * \text{\$tr} / 100)$$

Tax exemption

You can define a special tax when certain special conditions lead to a one-off or sectoral exemption (e.g. exempt training initiatives vs. sale of educational materials subject to 10% VAT)

You would choose, for example, the following definition:

- Name: VAT Exempted
- Tax ratio: 0
- Formula: $\text{\$ttc} = \text{\$ht}$

Edit tax

- To edit an existing tax, click the gear icon at the end of the corresponding tax line.
- To delete an existing tax, click the cross at the end of the corresponding tax line.

⚠ Note : The shop does not allow you to delete a tax **already associated** with products.

Once your products have been created, the number of products attached to a given tax will appear in the “Number of products” column.

Taxes

Tax name	Country	Ratio	Formula	Products using	
Exonéré	FR	0	$\text{\$TTC} = \text{\$HT} + (\text{\$HT} * \text{\$TR} / 100)$	11	
TVA 20%	FR	20	$\text{\$TTC} = \text{\$HT} + (\text{\$HT} * \text{\$TR} / 100)$	2	
TVA 5%	FR	5	$\text{\$TTC} = \text{\$HT} + (\text{\$HT} * \text{\$TR} / 100)$	0	
TVA 10%	FR	10	$\text{\$TTC} = \text{\$HT} + (\text{\$HT} * \text{\$TR} / 100)$	0
