

## Catalog categories (Product Lines)

### Moodle Integrated Shop : Structural elements

Categories let assemble products to present a single product line to the customer on a single page. some back-office management screen will also use categories to split the management scope.

You may use categories to group ensemble of product of same nature.

Category is implemented as a simple concept in the Moodle Shop.

#### Category Properties

##### Catalog ID

The catalog the category belongs to.

##### Name

External name of the category.

##### Description

This text is displayed as heading part of the front office when displaying the category content.

##### Parent ID

Let attach a category to another as parent. The front-office can display a hierarchic tab-tree for browsing into subcategories.

##### Order

Category display order.

##### Visible

A category may be visible or hidden.
