

# Catalog categories (Product Lines)

## Moodle Integrated Shop : Structural elements

Categories let assemble products to present a single product line to the customer on a single page. some back-office management screen will also use categories to split the management scope.

You may use categories to group ensemble of product of same nature.

Category is implemented as a simple concept in the Moodle Shop.

### Category Properties

#### Catalog ID

The catalog the category belongs to.

#### Name

External name of the category.

#### Description

This text is displayed as heading part of the front office when displaying the category content.

#### Parent ID

Let attach a category to another as parent. The front-office can display a hierarchic tab-tree for browsing into subcategories.

#### Order

Category display order.

#### Visible

A category may be visible or hidden.
