

The ShopObject Class

Moodle Integrated Shop : Structural elements

The ShopObject is the base class for all other functional classes of the Moodle Shop. It will provide a basic API for any other object and an abstraction layer to the DB storage.

Any object based on this class and telling which DB table it uses will provide a full internal mechanism to dehydrate and rehydrate data from database.

Méthodes

Constructeur `__construct`

```
@param mixed $recordid  
@param string $recordtable
```

Getters et Setters

`save()`

Sauvegarde l'état courant de l'objet en base de données.

`delete()`

Supprime le stockage persistant de l'objet en base de données.
