# The ShopObject Class

# Moodle Integrated Shop : Structural elements

The ShopObject is the base class for all other functional classes of the Moodle Shop. It will provide a basic API for any othe robject and an abstraction layer to the DB storage.

Any object based on this class and telling which DB table it uses will provide a full internal mechanism to deshydrate and rehydrate data from database.

## Methods

### Constructor __construct

```
@param mixed $recordorid
@param string $recordtable
```

### Getters and Setters

### save()

Save the current state of the object to DB.

#### delete()

Deletes the underlying record.
