Local Shop (Moodle store core engine)

- **Component type:** local
- **Name:** Shop
- **Versions:** m27 to m41
- **Distribution:** Public and PRO versions (dual release)
- **Availability:** Stable - Distribution **ActiveProLearn**

- **Repository:** Community version http://github.com/vfremaux/moodle-local_shop

Solution presentation

The shop core plugin provides a complete, flexible, and extensible base shop engine to transform Moodle “items” into saleable products. Items can be many things, since they are mainly linked to an action script triggered on product payment. Scripts can be custom or predefined. Shop implementation is equipped with a set of predefined action scripts, addressing the most common cases. “Product action scripting” is an extensible implementation that uses new scenarios as sub-plugins. The shop core engine is provided in both “community” and “PRO” versions:

The shop core engine is provided in both “community” and “PRO” versions:

1. The community release: features the full core engine, plus a limited set of action scripts and payment methods.
2. The “pro” version: comes with an extended set of action scripts, more payment methods implementations and a more complete set of reporting and integration tools.

Guides
