

StaticGUITexts (Static text integration in Moodle GUI)

- **Component type:** Local
- **Name:** StaticGUITexts
- **Plugin name:** local_staticguitexts
- **Versions:**  à 
- **Distribution:** libre
- **Disponibilité :** Stable

This component is dedicated to moodle integrators and provides a very light API to add text slots that can be modified by the administrator (editorial texts) at key locations in an interface. It is generally used as a toolbox element for Moodle developers in integration projects. Third party plugins might optionally rely on this module to let more flexible GUI writing. Extra capability may let other empowered people to change the text content.

This component has a MNET network behavior allowing to display texts from another Moodle that acts as a centralizer.
