

Local Shop : Technical guide (technical data)

Introduction

Required components :

Local plugins

- local_shop (Boutique Moodle)

Blocks

- block_shop_access : Sales management
- block_shop_total (Shopping cart)
- block_shop_bills (My transactions)
- block_shop_products (My products)
- block_shop_course_seats (Local seats management - optional)

Authentication

- auth_ticket : Ticket-based authentication for notification returns.

Installation

- Unzip the archives in their respective directories (/local for local plugins and /blocks for blocks).
- Then browse Moodle notifications to logically install these components.

The install creates a first shop by default (id = 1) that can be used to create a first front office.
