Setting up the activity

General

The screenshot shows the 'General' settings for a new activity. The interface includes fields for Name, Description, and various configuration options like Start time, End of time, and Gameplay.

- 1. Name*: A text input field where the activity name is entered.
- 2. Description: A rich text editor with a toolbar above it. The toolbar includes icons for Paragraph, Bold (B), Italic (I), and other text formats.
- 3. Display description on course page: A checkbox labeled 'page' with a help icon.
- 4. Start time: A date and time selector set to March 30, 2018, at 18:10.
- 5. End of time: A date and time selector set to March 30, 2018, at 18:10.
- 6. Question media type: A dropdown menu set to 'text'.
- 7. Media type for answers: A dropdown menu set to 'text'.
- 8. Decks: A dropdown menu set to '2'.

General settings

1. This is the activity name that will appear in the course.
2. Add in the activity intro any information that help students to understand what is the goal of the activity and how to use it the best way.
3. If checked, the intro will be displayed in the course page.
4. you may setup start date and/or end date for the activity.
5. Choose the gameplay, as Leitner, free, or both methods.
6. Select the media type to be used in the front (resp. rear) side of the cards. (text, image, sound, sound and image, video clip)

7. If checked, the media (sound or video) will start playing as soon as the page is loaded. If not, the user will have to start the media clip.
8. This setting defines the number of card stacks that will be used for the Leitner gameplay from 2 to 4. this number may depend on the global difficulty of the domain, and of the number of pairs to memorize. Big knowledge domains may need 4 stacks to enhance the memorisation process.

Review delays

Review triggering delay (deck 1)	48
	(?)
Review triggering delay (deck 2)	96
Review triggering delay (deck 3)	168
Review triggering delay (deck 4)	336

10-11-12-13. Defines the review trigger delay for the card stack. The stack will turn to “has to be reviewed” state after this delay (in hours) running from the last student review.

Notifications

When choosing “yes”, the learner will receive review request reminders after a time you define (the revision delay).

Card customization files

See advanced parameters.

Standard activity settings

As any other plugin, there are a set of standard settings for visibility, activity identification, group and groupment management.

Advanced settings

Advanced settings are usually not visible in the setting form, unless you activate the extra settings.

Deck Erosion Settings

Enable autodownloadgrade*

Autodownloadgrade overtime (deck 2)*

Autodownloadgrade overtime (deck 3)*

Autodownloadgrade overtime (deck 4)*

These settings allow you to activate the deck erosion feature, by which cards will migrate back a deck upwards if the delay is expired.

Cards customization files

You can add there some images to customize the cardset appearance. Take care the text and players will be printed over the images used in background.

- **Front card image**
- **Back side image**
- **Empty deck image:** Use a dimmed image to avoid confusion with a non empty deck ! This image is used when reviewing a deck to tell the last card has been consumed.
- **Needs review image:** Will be printed for students in the review interface for those decks that need review (programmed review delay is passed for the current user).
- **Reviewed deck image:** Printed for those decks that have been reviewed and do not require immediate replay.
- **Empty reviewed deck:** Printed for thos decks that have no card in and cannot be played.

Extra CSS

Teachers may customize additionnaly cards with a local CSS scriptlet.

Mise en place de l'activité

IMAGE A PLACER

- Usage de Leitner
- Usage Libre
- Bilan
- Modifier les cartes

Fonctionnalités particulières

Mode de Leitner

Sebastian Leitner est un ingénieur Allemand qui a mis au point la méthode de la "répétition espacée", aidant à la mémorisation d'ensembles de définitions. La méthode de Leitner se base sur le constat que notre mémoire favorise des données dites 'faciles à retenir', alors que d'autres résistent à la mémorisation. La méthode de Leitner se concentre sur les zones difficiles de l'espace à apprendre, en mettant de côté les items qui se mémorisent facilement et en concentrant la révision sur celles qui résistent.

Erosion des jeux

Le système d'érosion des jeux est une contrainte "punitive" pour les participants qui ne viendraient pas effectuer leurs révision avec suffisamment de rigueur. Lorsque l'érosion est activée, les cartes non révisées "remontent" dans les paquets plus difficiles, éloignant le participant de l'objectif d'avoir passé toutes ses cartes dans le dernier paquet.

Inversion des questions/réponses

Cette fonctionnalité simple permet de rejouer l'exercice dans l'autre sens, en présentant d'abord l'autre face des cartes. Cela permet de renforcer encore plus l'apprentissage.
