Scheduler module (Appointments)

Presentation

- This component allows scheduling face-to-face appointments between students and a contact person, teacher or not. You can publish the list of periods when you are available as slots of predetermined duration. Students can, for their part, book a slot among the choices presented to them, in several possible modes. The module lets you record the appointment report as well as an optional grade (in the case of project defences, for example).

Feature summary

- Booking of 1 to N appointments
- Display of an optional form when booking
- Option to add a message from the booker
- Option to add one or more attachments from the booker
- Scheduling of consecutive or non-consecutive availability slots
- Planning by groups or not
- Appointment summary table
- Statistics table
- Grading and comments on appointments, visible or not to students

Guides

- Technical guide

Technical sheet

- **Component type:** Activity module
- **Name:** Scheduler (Appointments)
- **Technical name:** mod_scheduler
- **Supported versions:** m41 to m53
- **Distribution:** Public.
- **Availability:** Stable.

Builds

Note: a “Failing” status does not necessarily mean that the plugin does not work. This status reflects the result of automated tests checking the code against Moodle's strict standards. We are continuously working on bringing all supported plugins progressively into compliance with these development rules.
