

Professional Development Certificate

- **Component type:** Activity module
- **Name:** PDCertificate
- **Versions :**  to 
- **Distribution :** Public and PRO
- **Disponibilité :** Stable.
- **Repository:** https://github.com/vfremaux/moodle-mod_pdcertificate

This module is a fork of the Community Certificate module, transformed to meet the following needs:

- This module allows a more powerful and flexible layout than the community plug-in “Certificate” offered by the Moodle community, allowing to customize each certificate in different ways, with layouts ranging from the formal letter to the diploma in landscape format.
1. Course enrol chaining allowing to define “following courses” in which the user will be enrolled after certificate issue.
 2. Extra role assignment on the certified course, one of its upper category or at site level upon certificate issuing.
 3. Delivery lock, needing a teacher to get the certificate for physical marking/signing by a local authority.
 4. Configurable Certification authority
 5. Delivery unlock can be triggered by an external event from an external plugin such as [Moodle shop](#)).

Builds

[Travis-ci continuous integration](#)

Note : Failing status is not necessarily the sign of a non functioning module. It just says that the moodle code standards check are not fullfilling. This is a continuous effort of us rewriting the plugin code to get it compliant.
