

Sharedresources Moodle Repository Plugin

- **Component type:** repository
- **Name:** Sharedresources
- **Technical name:** repository_sharedresources
- **Versions:**  à 
- **Availability:** Moodle Marketplace

Summary

This component is mainly delivered for two reasons:

1. It is the seat of Moodle capabilities driving the use of the central library
2. It is intended to be able to access the content of the shared library according to the method of the “depositions” of resource Moodle. Unfortunately, for lack of time and resources, this function is not yet complete. However, the component remains necessary for the overall operation of the library system.

Associated components

- [Central Shared resource library \(local\)](#)
- [Sharesource activity module](#)
- [Conversion tool accessory block](#)

List of capabilities
