FordsonFEL: An advanced bootstrap theme

Presentation

The Fordson FEL theme is a bootstrap theme derived from the very popular Fordson theme (from Moodle 3.2). It keeps the flexible and advanced front page features (announcements, widgets, course display, slider, etc.) and includes significant modifications of some “renderers”, i.e. modifications that **strongly impact the rendering** for an improved user experience.

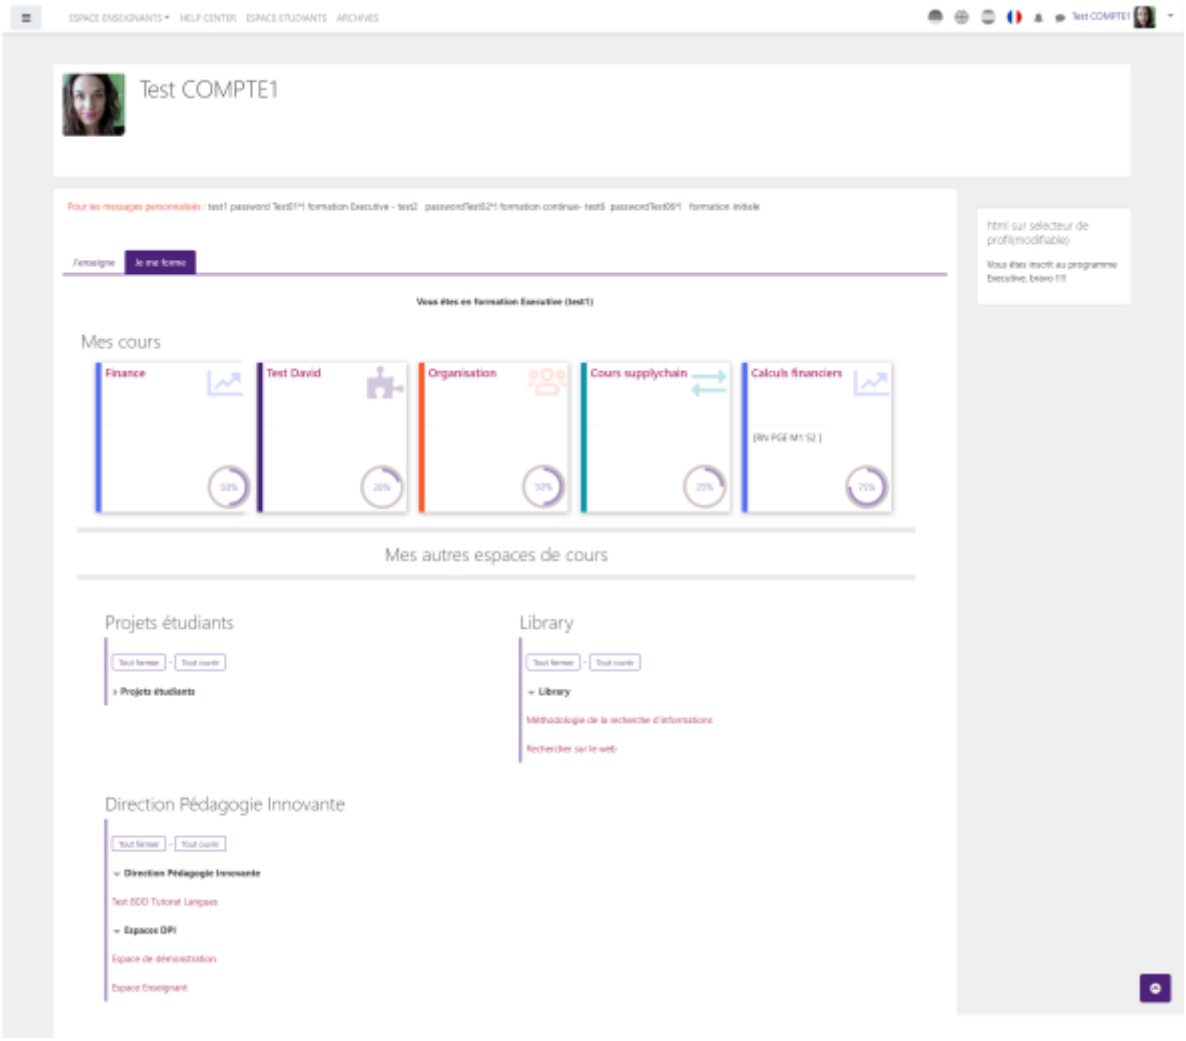

Guides to the specific features

- Rights-controlled custom menu
- Custom menus displayed on the right or on the left
- Login page with a choice of random background images
- Multi-zone footer with shortcodes and social icons
- “Integrated” improved My Moodle: overhaul of the dashboard strategy Improved My Moodle/dashboards
- Integrated user equipment “User Equipment”
- Integrated page course format
- Integrated image view course format
- CSS overrides improving the graphic rendering of activities and resources
- Style override of sections in section-based course formats for teachers without code
- Display of a “new” signal when a resource is modified or added

Access to the user guides

- Theme installation guide
- General theme user guide
- Theme images

Technical sheet

- **Component type:** Theme
- **Name:** Fordson FEL
- **Technical name:** theme_fordson_fel
- **Supported versions:**  to 
- **Distribution:** PRO (TMA)
- **Availability:** For referenced customers.

Builds

Note: a “Failing” status does not necessarily mean that the plugin does not work. This status reflects the result of automated tests checking the code against Moodle's strict standards. We are continuously working on bringing all supported plugins progressively into compliance with these development rules.
