# FordsonFEL: An advanced bootstrap theme

# General theme guides

Access: site admin/appearance/theme/FordsonFEL

- Variant settings
- Presets
- Preset adaptation
- Menu settings
- Content area
- Navigation icon
- Footer
- Custom image settings
- Colours
- Home page announcements
- Slideshow
- Activities/resources
- Custom login page
- Customised positionable menu controlled by rights
- Customisation of section styles by teachers
- One illustration for the course thumbnail, one for the banner in the course

## Presentation of the theme elements modified compared to the base stock

### Login page

- **Force the site entry on the login page:** Site administration > Security > Site policies > Force users to log in: tick the box
- **Show the logo in the login box:** Site administration > Appearance > Logos > Logo = Upload an image here.
- **Place a series of random login page background images:** fordson_fel > Custom image settings > loginimage area > Drag the desired images into the area.
- **Place a banner image:** fordson_fel > custom login page > place a login page banner image (logintopimage): drag your logo or image here
- **Show a message on the login page:** fordson_fel > Content areas > Home page alert > Enter your text

### Panel at the top of courses

The panel at the top of courses is hidden in our integration model, and the right side panel allowing blocks to be added has been reinstated.

### Left side panel of courses

The access menu to Moodle's standard home page is hidden in our integration model, because the strategy used is that of displaying the "Improved My Moodle" component (local My), which is a highly personalised dashboard for the different user typologies.

### Footer

Modification of the footer renderer to accept a left, centre and right area

---
