FordsonFEL: An advanced bootstrap theme

One theme, 10 variants

For Moodle sites hosted by APL, you have 10 variants of the theme, which let you adapt the look and feel to all use cases:

- Fordson fel: Apply this theme to your Moodle instance
- Fordson fel 1: Variant that applies to the course or category of your choice
- Fordson fel 2: Variant that applies to the course or category of your choice
- Etc.

To use the variants: Allow course themes (allowcoursethemes): checked if applicable Allow category themes (allowcategorythemes): checked if applicable

Access: Site admin/appearance/themes/theme settings

Variant settings

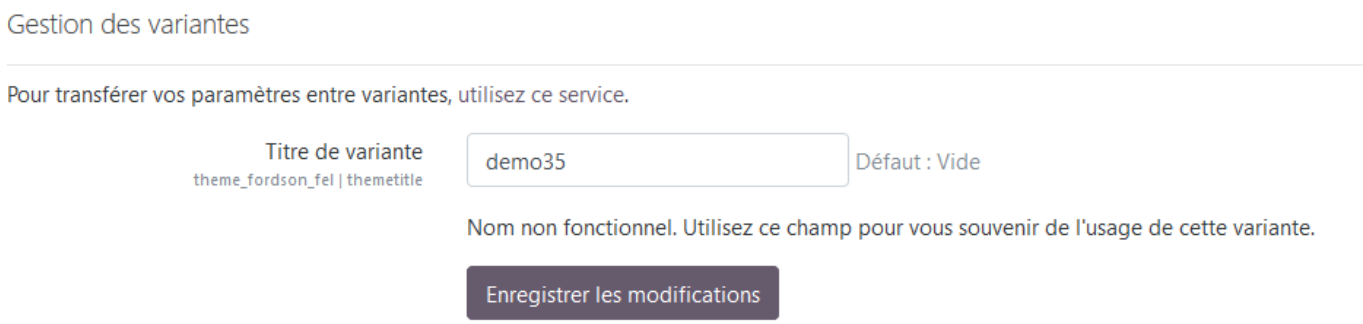

This section presents two elements:

- 1/ Access to a utility (“use this service” link) to transfer settings between the different variants of your theme.

In the mode hosted by us, you have 10 variants of the theme numbered 01 to 10 in addition to the main variant “fordson_fel”

- 2/ entering a variant title to remember the elements of your choice

Access: Site admin/appearance/themes/FordsonFEL/variant settings

Transfer of settings between variants

This utility enables industrialised production of a theme variation by transferring settings from one variant of the theme to another, so you only need to change the colours and/or adapt the settings afterwards, saving considerable time.
