Klassplace: A flat design theme: Menu settings

Introduction

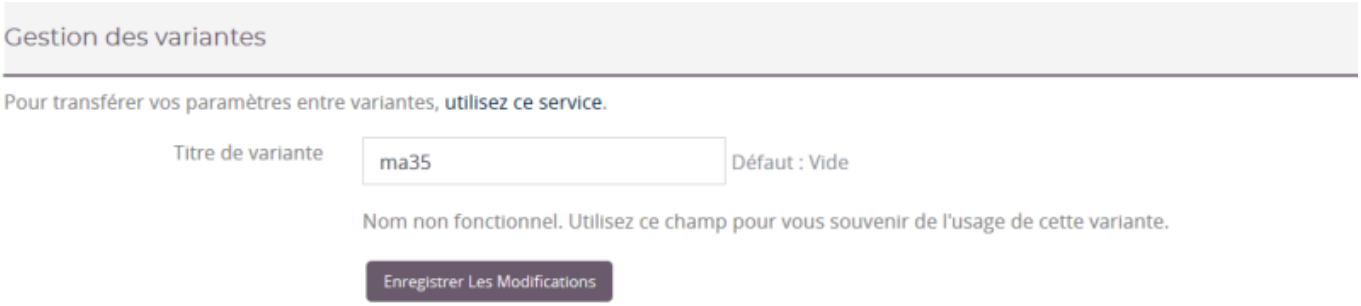

This menu is used to manage theme variants. The principle is to be able to quickly create an exact copy of the theme settings, so you only need to change, for example, the colour set used.

You then assign a variant to a course, a course category or a cohort, according to your pedagogical needs.

Also remember to indicate, as a memo (no functional impact), the name of your theme variant.

Usage

- **“use this service” link:** Choose a source variant and a target theme variant to copy all the settings of the source theme
- **Variant title:** Enter a title: Example blue/midnight blue variant or course category X variant
