DB cleaner: Data model clean-up tool

Presentation

The component is an industrial administration tool for cleaning the database

Guides

- Installation guide
- User guide
- Technical guide

Feature summary

- Find all orphan records in Moodle, starting from a knowledge base of foreign keys, and clean the database
- Detect some signatures of plugins that are no longer installed in the database and clean the database

Road map

- Writing a controller (in progress)

Technical sheet

- **Component type:** Administration tool
- **Name:** Database clean-up
- **Technical name:** tool_dbcleaner
- **Supported versions:** m41 to m53
- **Distribution:** APL integration
- **Availability:** Private

Builds

Note: a “Failing” status does not necessarily mean that the plugin does not work. This status reflects the result of automated tests checking the code against Moodle's strict standards. We are continuously working on bringing all supported plugins progressively into compliance with these development rules.

Branch	Continuous integration tests
405	custom badge resource not found
501	custom badge resource not found
