Tool MnetUsers (MNET user propagation tool)

This administration tool lets a manager push local users to an accessible MNET platform of which they are also a manager, so that these users' accounts exist on the remote site **before they log in there**.

Guides

- Installation guide
- User guide

Feature summary

- Selects users and target sites
- Can assign system roles on the remote site
- Can grant/remove site administrator status on the remote site

Builds

Note: a “Failing” status does not necessarily mean that the plugin does not work. This status reflects the result of automated tests checking the code against Moodle's strict standards. We are continuously working on bringing all supported plugins progressively into compliance with these development rules.

Branch	Continuous integration tests
405	custom badge resource not found
501	custom badge resource not found
