Tool Sync: Input file format

Introduction

Although UTF-8 has entered a phase of generalisation, some legacy tools and systems may offer different formats. These settings let you globally adjust the technical formatting of the text files supplied to the synchronisation tools.

Warning, this format applies to all files. You will have to make sure that the files supplied to the different tools you use are uniform.

Details

Encoding choice

The currently supported encodings are:

- UTF-8
- ISO-8859-1 (Latin 1)

Field separator choice

You can choose here the separator character of text file fields.

Back to the user guide index - Back to the component index - Back to the catalogue
