Tool sync: Bulk course reset file format

Introduction

This file drives the reset of several courses. It is not tied to a scheduled task.

Field	Value	
shortname	Course short name	Mandatory
events	'yes' or 'no'	Mandatory
logs	'yes' or 'no'	Mandatory
notes	'yes' or 'no'	Mandatory
grades	one of ('items', 'grades', 'nothing')	Mandatory
roles	a list among ('guest', 'admin', 'student', 'teacher', 'editingteacher', ...) or 'all'	Mandatory
local_roles	whether local role assignments (outside enrolment) must be removed or not. 0 or 1	Mandatory
groups	one of ('members', 'groups', 'nothing')	Mandatory
groupings	one of ('all', 'members', 'groups', 'nothing')	Mandatory
modules	all: all the modules, otherwise a succession of module names separated by spaces, with the possibility of selecting by exclusion (see example)	Mandatory
forum_all	1 or 0	Optional
forum_subscriptions	1 or 0	Optional
chat	1 or 0	Optional
...	1 or 0	Optional

Note to the developer

By creating a resetlib.php file at the root of your modules and writing the '$modname'_reset_course_form_definition function returning an array of reset variables, you can make your module compatible with this script. Also remember to complete the '$modname'_reset_course_form_default functions in your module's lib.php.

Example document for the reset

- shortname, roles, grades, groups, events, logs, notes, modules
- short321, guest admin student teacher editingteacher, grades, members, no, yes, yes, all
- short322, student, items, groupes, yes, yes, yes, all
- short323, student teacher editingteacher, grades, members, yes, no, no, -forum -chat

The last line corresponds to: All modules except the forum and the chat.
